

DERMA SPRAY

抗菌喷雾

Pre and Probiotic Skin Spray 益生菌皮肤喷雾

DESCRIPTION 描述

SO VERSATILE, NO STABLE SHOULD BE WITHOUT IT!

用途如此广泛，马房日常必备品！

Bacteria are everywhere, both the good and the bad kinds. If a horse has a weak immune system or too many 'bad' organisms (pathogens), these can quickly gain the upper hand and cause the horse to be more susceptible to infections. Organisms can spread and transmit infections everywhere – especially on brushes, halters and sheets. Horses can also carry a fungus without showing any symptoms. It is therefore strongly recommended that the risk of infections be kept under control.

细菌无处不在，无论是好的和坏的种类。如果一匹马的免疫系统较弱或“有害”生物（病原体）过多，它们会迅速占上风，导致马更容易受到感染。有机体可以在任何地方传播感染。

THE DISINFECTION PARADOX

消毒悖论

Bactericidal products such as disinfectants and antibiotics have been used for many decades, under the assumption that they eliminate existing problems. Figure 1 shows that disinfection kills not only germs but also 'good' bacteria, and in particular that all microorganisms are not completely eliminated. The will to survive in bacteria is so strong that they continuously adapt to circumstances and can develop into resistant superbacteria, causing disinfectants and antibiotics to work less effectively. After disinfection, the surviving bacteria then multiply at lightning speed.

消毒剂和抗生素等杀菌产品已经使用了几十年，假设它们可以消除现有问题。图 1 表明，消毒不仅可以杀死细菌，还可以杀死“好”细菌，尤其是所有微生物都没有被完全消除。在细菌中生存的意志是如此强烈，以至于它们不断地适应环境，并可以发展成具有抗药性的超级细菌，从而导致消毒剂和抗生素的效果降低。消毒后，存活的细菌会以闪电般的速度繁殖。

BOOST THE IMMUNITY WITH BACTERIA?

细菌可以增强免疫力？

Due to the importance of good equine hygiene and the increase

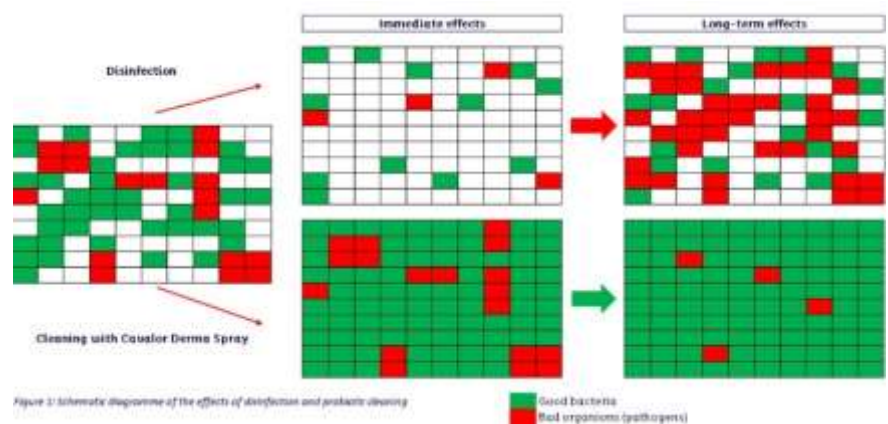

Figure 1: Schematic diagram of the effects of disinfection and probiotic cleaning

in resistant organisms, Cavalor has developed a sustainable solution making essential use of pre and probiotics. In nutrition, pre and probiotics' beneficial effects on intestinal health have been proven many times. This is part of Cavalor's recipe for keeping horses healthy from the inside out. This includes Cavalor VitaFlora for optimum digestion in the 22colon. The use of pre and probiotics in cosmetics and skin care signals the beginning of a new era. This new and revolutionary approach may also help eliminate excessive use of antibiotics and antimycotics (fungicides).

由于卫生的重要性和抗性微生物的增加，Cavalor 开发了一种可持续的解决方案，充分利用益生元和益生菌。在营养方面，益生菌和益生元对肠道健康的有益作用已被多次证明。这是 Cavalor 让马由内而外保持健康的秘诀的一部分。这包括 Cavalor VitaFlora 肠胃益生菌在内，在化妆品和护肤品中使用益生菌和益生元标志着一个新时代的开始。这种新的革命性方法也可能有助于消除抗生素的过度使用

HOW DOES CAVALOR DERMA SPRAY WORK?

Cavalor 抗菌喷雾是如何工作的？

Use Cavalor Derma Spray as a natural cleansing spray for hooves, skin, coat, mane and tail. The pH-neutral formula, specially created for a horse's skin, encourages the natural defense mechanism of the skin and promotes a healthy balance of microflora. It helps 'good' bacteria to gain a footing in the affected area and multiply more quickly and inhibits the adhesion of external organisms. This prevents and alleviates important skin problems. Cavalor Derma Spray can also be used to clean wounds, helping to support the body's natural healing response.

使用 Cavalor Derma Spray 作为蹄、皮肤、鬃毛和尾巴的天然清洁喷雾。专为马的皮肤设计的中性 pH 值配方可促进皮肤的自然防御机制并促进微生物群落的健康平衡。它有助于“好”细菌在受影响的区域站稳脚跟，更快地繁殖并抑制外部生物的粘附。这可以防止和缓解重要的皮肤问题。Cavalor Derma Spray 也可用于清洁伤口，帮助支持身体的自然愈合反应。

DESCRIPTION 描述: Clear liquid 白色液体

Directions of Use 使用说明

For microflora imbalances of the skin (itching, tears to skin in the fetlock area, wounds, skin problems, etc.). Apply to the affected area twice daily in case of disturbed skin flora (itching skin irritations, cracked heels,...

对于微生物群落失衡皮肤（瘙痒，鸡眼区域皮肤以及撕裂伤口等皮肤问题）。如果皮肤菌群受到干扰（皮肤瘙痒，蹄底龟裂等），每天涂抹两次在受影响区域。

Packaging & Storage 包装& 储存

250 毫升/ 瓶

Caution: for external use only. Keep out of reach of children

仅用于外用，请储放在远离儿童处。
